

# ALIREZA YOUSEFZADEH

JUNIOR ANDROID DEVELOPER

Junior Android Developer with a foundation in Kotlin and core Android basics. I'm currently focused on learning professional development practices, modern Android tools, and building real-world skills step by step. I enjoy understanding how apps work under the hood and improving my code quality as I grow. My goal is to become a confident, professional Android developer and contribute to meaningful mobile products.

## PROJECTS

**2024 – Present**

KOTLINFINITY

- KotlinFinity is a collection of Kotlin basics, examples, and explanations -- built to show what i learned from Kotlin in past years.

https://github.com/33Alireza/KotlinFinity

**2025 – 2025**

MOBILE DEVELOPMENT ROADMAP

- In the beginning i had the problem of not knowing what to learn to become an android developer and generally a software engineer, so i collected some data about Android, iOS and Cross-Platform development, and the outcome is this repository.

https://github.com/33Alireza/Mobile.Development.Roadmap.2025
